

EXPLORE: Fur, Scales and Feathers!! Year 1

Sticky Knowledge

There are 4 main points on a compass North, East, South, West.

We use positional language to describe where things are and to give directions to move around a map e.g. forwards, backwards, up, down, left, right, under, North, South, East West.

There are 5 main groups of animals that have specific features – birds, mammals, fish amphibians and reptiles.

There are 3 different groups of feeders - omnivores, herbivores and carnivores.

Different animals live in different habitats – almost every place on Earth from the hottest desert to the coldest icepack is a habitat for some kind of animal or plant.

Most animals are covered with fur, feathers or scales and these are used to help group them into reptiles, mammals, fish, amphibians or birds.
